## INSTALLATION METHODS

*+ There are several types of installation methods 4Ever Products recommends.*

**1** The top rated method is using direct burial. The posts would need to be buried into the ground at least 2' and stabilized with cement.

**2** The second method would be to use wooden 4x4s to reinforce the posts. We recommend leaving a space of 12" in between the bottom vinyl rail and the top of the wooden post. **\*ONLY RECOMMENDED FOR STREET SIGNS**

**3** The third method is using the Ground Breaker Stake. This stake system is recommended for a short term installation or a sign that will
